MAINTENANCE WORKS

Thanks to everyone for their patience and forbearance while we had some necessary works undertaken in the past two weeks. Normal parking was disrupted while the regular safety inspection and maintenance of the trees on our outer border was done, and the Bridge players had their concentration tested as Gary, our wonder handyman, repaired the door recently damaged by vandals. Thanks again to you all.

FREE STUFF !! (almost)

There is a table in the foyer with a couple of boxes of recent magazines and puzzle books eg sudoku and crosswords.

These were donated for the Book Fair, but we thought it better to offer them to members. Please have a look and if there is something there you would like, please help yourself. The boxes will be replenished as we go along. There is a jar on the table if you would like to leave a small donation.

Be kind to everyone please, do not enter the Club if you are feeling unwell and developing cold or flu like symptoms (including headache, fever, cough, sore throat, fatigue or shortness of breath).

If you're happy and you know it,
stay in bed.
If you're happy and you
know it, stay in bed.
If you're happy
and you know it, getting up will
surely blow it.
If you're happy and
you know it, stay in bed.

**A friend suggested
putting horse manure
on my strawberries...
I'm never doing that
again, I'm going back
to whipped cream.**

See below for Chapter 2 of the Tech Support story! Don't forget, all back issues of the Fortnightly News are posted on the Club's website, <https://www.wodenseniors.org.au/category/fortnightly-news/>.

An oldie – but a goodie! – Chapter 2

Dear Tech Support:

Last year I upgraded Girlfriend 1.0 to Wife 1.0 and noticed the the new program began unexpected child processing that took up a lot of space and valuable resources. No mention of this phenomenon was included in the product brochure. In addition, Wife 1.0 installs itself into all other programs and launches during system initialization where it monitors all other system activity. Applications such as Poker-night 10.3 and Beer-bash 2.5 no longer run, crashing the system whenever selected. I cannot seem to purge Wife 1.0 from my system.

I am thinking about going back to Girlfriend 1.0 but uninstall does not work on this program.

Can you help me?

Dear Sir:

This is a very common problem men complain about but is mostly due to a primary misconception. Many people upgrade from Girlfriend 1.0 to Wife 1.0 with the mistaken idea that Wife 1.0 is merely a "Utilities and Entertainment" program. Wife 1.0 is an OPERATING SYSTEM and designed by its creator to run everything. It is impossible to uninstall, delete or purge the program from the system once installed. You cannot go back to Girlfriend 1.0 because Wife 1.0 is not designed to do this. Some have tried to install Girlfriend 2.0 or Wife 2.0 but end up with more problems than they had with the original system. Look in your manual under warnings Alimony/Child Support. I recommend you keep Wife 1.0 and just deal with the situation. Having Wife 1.0 installed myself, I might also suggest you read the entire section regarding General Protection Faults (GPFs). You must assume all responsibility for faults and problems that might occur. The best course of action will be to push apologize button then reset button as soon as lock-up occurs. System will run smooth as long as you take the blame for all GPFs.

Wife 1.0 is a great program but requires lots of maintenance.
